Bricks – The Right Choice

If you want your home to stand the test of time when it comes to style, durability, level of maintenance, energy efficiency and long term resale value, then brick really is the right choice. Bricks are safe, solid and will last for a very long time with virtually no maintenance. Brick doesn't require any painting or patching. It never fades, warps or rots. And with virtually no effort or expense, your brick home will look as beautiful 60 years from now, as it does today. What's more, bricks are a sustainable, energy efficient choice. They provide thermal mass, an integral part of energy efficient design, and a proven way to reduce the need for heating and cooling devices.

BASIX Classification

 Exposure Grade Bricks

*These products are subject to a manganese product levy.

Brick and texture colours in this brochure are indicative only.
