

# MONAISE RESIDENCE

As seen on Open Homes Australia, the Monaise Residence is a beautiful restoration project that lies in the Brisbane suburb of Ascot. Shaun Lockyer Architects have blended traditional Queensland and Colonial architectural styles to complete a truly unique build.

The combination of using four **PGH Bricks & Pavers** products in this restoration project, created a crafty blend that fit with the architects' vision. The build features; Black and Tan, and Copper Glow from the Smooth range, along with Macarthur Mix and Mowbray Blue from the Dry Pressed Architectural range. The new form is playful and allows for a certain architectural expression that cannot be achieved with other building materials. Internally, the existing brickwork was restored and repainted. It was critical that this project honoured the history of the home, leading integrity to take precedence over design and colour consistency.
