# Botanicals Range

Bringing the strength and beauty of nature to brick.

Your home is your haven for tranquillity, relaxation and taking the time to reconnect with the life-giving wonder of nature. Inspired by the natural colours and textures that nature provides, our new Botanicals brick range combines beautiful, earthy tones with the strength and durability of Australia's favourite building material - brick.

# Botanicals

## Bringing the strength and beauty of nature to brick.

Four gorgeously earthy and natural colours make up the new Botanicals brick range - Elderberry, Juniper, Sage and Sandalwood. The colours can be used on their own or combined with other colours and materials to create a harmonious, organic palette for your home's facade.

Our Botanicals brick range allows you to bring the holistic peace, reflection and inherent beauty of natural flora to your home, while using a material that's both strong and sustainable.

### Sandalwood

A soft and muted tone evoking memories of warm sand between your toes, the Sandalwood brick is the perfect creamy base tone for coastal, heritage or contemporary homes.

### Elderberry

Dark and warm, Elderberry is a bold and beautiful brick with a purple-chocolate accent undertone. Inspired by the strength and stability of an Oak Tree and the richness of a cacao pod, Elderberry brings a new depth to neutrality.

### Juniper

Juniper is a medium-toned grey brick with warm undertones, reminiscent of a heavy storm cloud. A great standalone colour or ideal for those wanting to complement their bricks with natural materials like wood and stone, Juniper is a trendsetting texture that mimics that found in nature.

### Sage

The epitome of 'on-trend', Sage is the shade taking the world by storm. A soft, delicate green evoking feelings of Spanish moss draped over a Cypress Tree, Sage is a versatile and design-flexible muted green tone that's perfect for those wanting to bring the beauty of nature into their home.
