 CULTURED STONE

A first impression set in stone.

Remember how you felt the first time you walked into your dream home? That excitement and pride never goes away when you enhance the exterior of your home with Cultured Stone®. Whether pulling into your driveway or catching a parting glimpse in the rear view mirror, the character and charm of Cultured Stone® makes a bold and lasting impression.

There is no question that stone is loved for its strength, durability and authenticity. It is recognised as a material that adds beauty and character to any space. But despite this, stone can be heavy, difficult to install, expensive and limited in terms of choice.

PGH Bricks & Pavers™ recognised the opportunity to overcome these issues and has introduced Cultured Stone® to the eastern states of Australia.

With 50 years in the US market, Cultured Stone® is a manufactured stone cladding product that has all the qualities of traditional stone but with significant added benefits. Modelled from natural stone and created with painstaking care and artistry, Cultured Stone® achieves the depth, complexity of colour, pattern and unique texture of stone. With eight distinct ranges and a diverse palette of colours, there are numerous options for size, shape and texture, providing the freedom to create a truly personal look.

HAMLAN

ASPEN SOUTHERN LEDGESTONE

Thoroughly modern. Totally modular.

Challenge convention. Elevate trends. Create demand.

At the epicentre of the contemporary architecture and design movement, you'll find Cultured Stone® - the inspiration behind some of today's most innovative and striking modern structures.

Our Modera Pro-Fit® collection offers a practical way to achieve a tailored ledgestone look with small-scale, low relief stones. It's quick and easy to install because it isn't applied one stone at a time. Instead, the primary building blocks are groups of small stones meticulously bundled together to form modular components of equal height. Modera Pro-Fit® products also feature the patented Cultured Stone® cladding interlocking mortar groove for secure adhesion without grouted joints.

Celebrating spaces.

While our gorgeous Cultured Stone® cladding tends to be the centre of attention, it's often the grouting styles in between that can really make a difference. Creating the right mortar joint for a project is a matter of choosing not only the perfect colour, but also the right width - a choice that naturally affects the total square metres.

And while a standard mortar joint is typically 1/2" in width, some stone textures allow for a dry stacked, tight-fitted joint to achieve a clean, tailored appearance.

Fall in love with outdoor living.

If home is where the heart is, your outdoor space is where the real love affair is waiting to unfold. Think of it - a canvas of possibilities waiting to be designed and enjoyed with a gorgeous stone fireplace, a dramatic fountain or even an entire outdoor room. With Cultured Stone® cladding serving as the backdrop, even the simplest outdoor activities become unforgettable moments all day long and deep into a moonlit night.

The finishing touch.

Finishes communicate the care and attention to detail afforded to designing dream homes and well-appointed places of business. The architectural stone trims offered in our Cultured Stone® portfolio are meticulously crafted to provide the perfect finishing touch to your project. After all, even the smallest trim piece can play an indispensable role in the larger narrative waiting to unfold.

This distinctive look of Cobblefield® stone cladding is at home in residential or commercial settings.

COBBLEFIELD®

TEXAS CREAM COBBLEFIELD®

The delicate fossil patterns and unique surface characteristics of Coral Stone cladding complement contemporary architecture and design. It can be installed as a random ashlar or in a repeating pattern.

Planning your project.

Realising your vision for your home might be easier than you think. Whether you're working with an architect or a designer, hiring an installer, or planning to do it yourself, Cultured Stone® manufactured stone cladding is a great way to bring your dreams to life.

HERE ARE SOME OF THE THINGS YOU'LL WANT TO CONSIDER AS YOU'RE PLANNING YOUR PROJECT

STYLE

Consider the style, size and surroundings of your home. With so many options, there's sure to be a Cultured Stone® texture and colour that's the perfect complement.

TEXTURE

Utilising different textures can create a dramatic effect indoors or out. That's why there are so many Cultured Stone® options to choose from, including:

- Ledge
- Field
- Rubble
- Random Ashlar

COLOUR

Are you looking for neutral or warm? Vibrant or muted? What about a diverse palette? Cultured Stone® is available in a stunning variety of colours. You can even blend two or more textures or colourways to create a distinctive result.

TRIM

A selection of Cultured Stone® cladding accessory products are available to put the finishing touch on your project.

GROUT

The colour of the mortar you use can have a big impact on the overall look of the project. It can blend with the stone cladding or complement the colourway and make it stand out.

While some Cultured Stone® cladding stone textures are designed to be installed only with or without the standard 12mm mortar joint, others may be installed using a variety of techniques for greater design flexibility. Among the most popular installation techniques are dry stacked, tight-fitted stone without a mortar joint; standard 12mm mortar joint finished in a variety of ways (e.g., raked, full to face, overgrouted, or various forms of weeping joints); and wide joint, usually full to face or overgrouted.

INSTALLATION

A list of preferred installers in your area is available call 13 15 79 or visit pghbricks.com.au.

To view our installation videos visit pghbricks.com.au.

Technical information.

TECHNICAL DATA

Cultured Stone® products are engineered to meet or exceed the specifications set by building code officials. Visit pghbricks.com.au to download a technical manual.

UNIT WEIGHT

Weight is approximately 33-54kg/m² but not more than 60kg/m².

THICKNESS

1¾" average. May vary depending on choice of texture.

COLOURFAST

Colours become an integral part of the stone during casting. Existing applications show no undesirable change in colour after years of weathering.

NONCOMBUSTIBLE/SURFACE BURNING CHARACTERISTICS

UL tested and listed. Cultured Stone® products tested out with zero flame spreadw smoke development.

TECHNICAL SUPPORT

Please contact culturedstoneaus@pghbricks.com.au for further information.

MAINTENANCE

Cultured Stone® cladding is virtually maintenance-free. If required, lightly wash to remove dust or dirt. Do not sandblast or wash with acid, abrasives or high-pressure water. Damaged or graffiti-marred stones can be removed and replaced with matching materials.

LIMITED WARRANTY

Cultured Stone® wall products carry a 50-year limited warranty* when used on structures that conform to local building codes and when installed according to manufacturer's instructions.

Warranty is limited to replacement or repair of defective materials only and does not cover labour to remove and replace. Warranty does not cover damage resulting from building settlement, wall movement, contact with chemicals or paint, discolouration due to airborne contaminants, and staining or oxidation. Warranty is limited to the original purchaser.

*Details of Boral Stone Products LLC limited warranty is available at www.pghbricks.com.au.
