

PGH BRICKS & PAVERS™

READY SET
RENO

READY, STEADY, BRICKS!

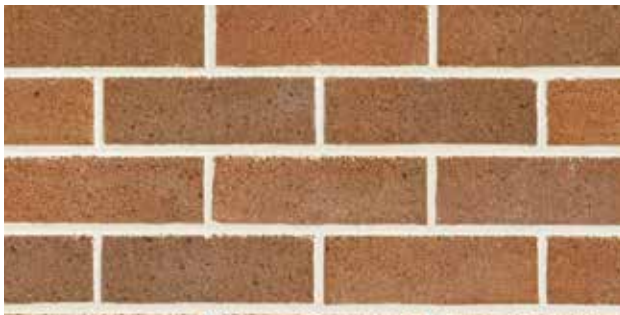

Everyone knows how tough renovating can be – and how rewarding. PGH Bricks has partnered with ex-The Block contestants Michael and Carlene Duffy and their efforts to renovate a huge property in Queensland on the show Ready Set Reno! The result is a stunning, contemporary home reflecting the industrial look trend that is hot right now in Australia.

CSR

Aspiring homebuilders or renovators can use Michael and Carlene's home as inspiration for their own project. There are great tips and tricks throughout the series – creating a feature wall for a bathroom (surprisingly practical); adding in brick seating in the outdoor areas to connect visually with the exterior façade; plus the layering of brick with timber cladding to create a contemporary industrial feel to a new build on an old footprint.

Michael and Carlene chose two different PGH bricks that were featured in the series: **Black & Tan Smooth** (external walls) and **Hawkesbury Bronze** (internal feature walls). These two products reflect the home's industrial-style aesthetic and use of rich textures, while still maintaining a contemporary look and feel. Bricks are undoubtedly the heroes of the build, providing the base colour palette for the whole house, as well as a feeling of authenticity.

GET THE LOOK

BLACK AND TAN SMOOTH

HAWKESBURY BRONZE DRY PRESSED

Bricks have been featured in the bathroom with a rich feature wall that perfectly balances a timber vanity.

The Duffys created an industrial look that's hot in Australia right now, a contemporary composite façade of brick and timber cladding.

Bricks have been featured throughout the hallways to create a contemporary industrial feel.
